VALUES EDUCATION PROGRAMME

Welcome to the Susdevalues Project! Our mission is to promote values education through our innovative Values Education Program (VEP).

Explore the transformative journey of reassessing and embracing values for a more just and humane society. Unlock the power of values as we delve into why values are crucial and their impact on personal development.

Embark on a comprehensive exploration of our five VEP sections, each designed to broaden perspectives and foster a commitment to building a more independent and democratic society.

VEP is tailored for adults and learners in partner countries and EU nations. It's also adaptable for community centers, fostering inclusivity and diverse participation.

Participants will gain 80 hours of invaluable learning, reevaluating old and embracing new values. VEP contributes to sustainable societal development, raising awareness, and bridging generational gaps

In the culmination of Work Package 3, our VEP journey finds its zenith in two impactful conferences—first in Latvia and then in Turkey. These events mark the fruition of our commitment to building a more just and humane society through values education. As participants gather to explore "European Values and Family Values," we celebrate the transformative power of understanding, fostering connections, and bridging cultural divides. These conferences not only conclude our program but also symbolize the beginning of a shared vision for a world where values guide us towards a brighter, more inclusive future.
